TITLE & ABSTRACT SUBMISSION

PROJECT DEVELOPMENT THESIS

TITLE : OCR-Based Contract Analysis and Simplification System

DOMAIN: Artificial Intelligence (AI) & Natural Language Processing (NLP)

BATCH DETAILS :

Batch No: 135

VAISHALI KHANDOBA	-	2211CS010582
SUNKARI SAI VARSHINI	-	2211CS010548
SRIMANTHULA VAMSHI KUMAR	-	2211CS010543
YARLANKI UDAY KIRAN	-	2211CS010608

GUIDE NAME: Mrs. P. Sabitha

ABSTRACT:

Understanding legal contracts is often difficult due to complex language and technical terminology, making manual analysis time-consuming and error-prone. This project presents an OCR-Based Contract Analysis and Simplification System that automatically analyzes contract documents and provides simplified explanations of important clauses. The system accepts a contract image as input and uses Optical Character Recognition (OCR) to extract text, followed by rule-based text processing techniques to analyze the content. A rule-based Artificial Intelligence approach is applied to detect the contract sector, such as Construction, Information Technology, or Healthcare, using domain-specific keywords. Based on the detected sector, key contractual terms are identified and explained in simple language to enhance readability and understanding. The system does not rely on machine learning or training datasets, ensuring consistent and explainable results. This approach helps users quickly comprehend contract documents, reduces dependency on legal experts for basic interpretation, and demonstrates the practical application of OCR and AI in document analysis and automation.
